

solution was created during Hackathon „Hack the Crisis Slovakia“, 3.-5.4.2020
www.gesadila.com

Democracy in need in the time of Corona

- Citizens asked to stay at home
- Elected representatives asked to meet and vote as in ancient times – on the same place at the same time
- To meet personally, means to risk infection
- Persons in quarantine are excluded from decision-making

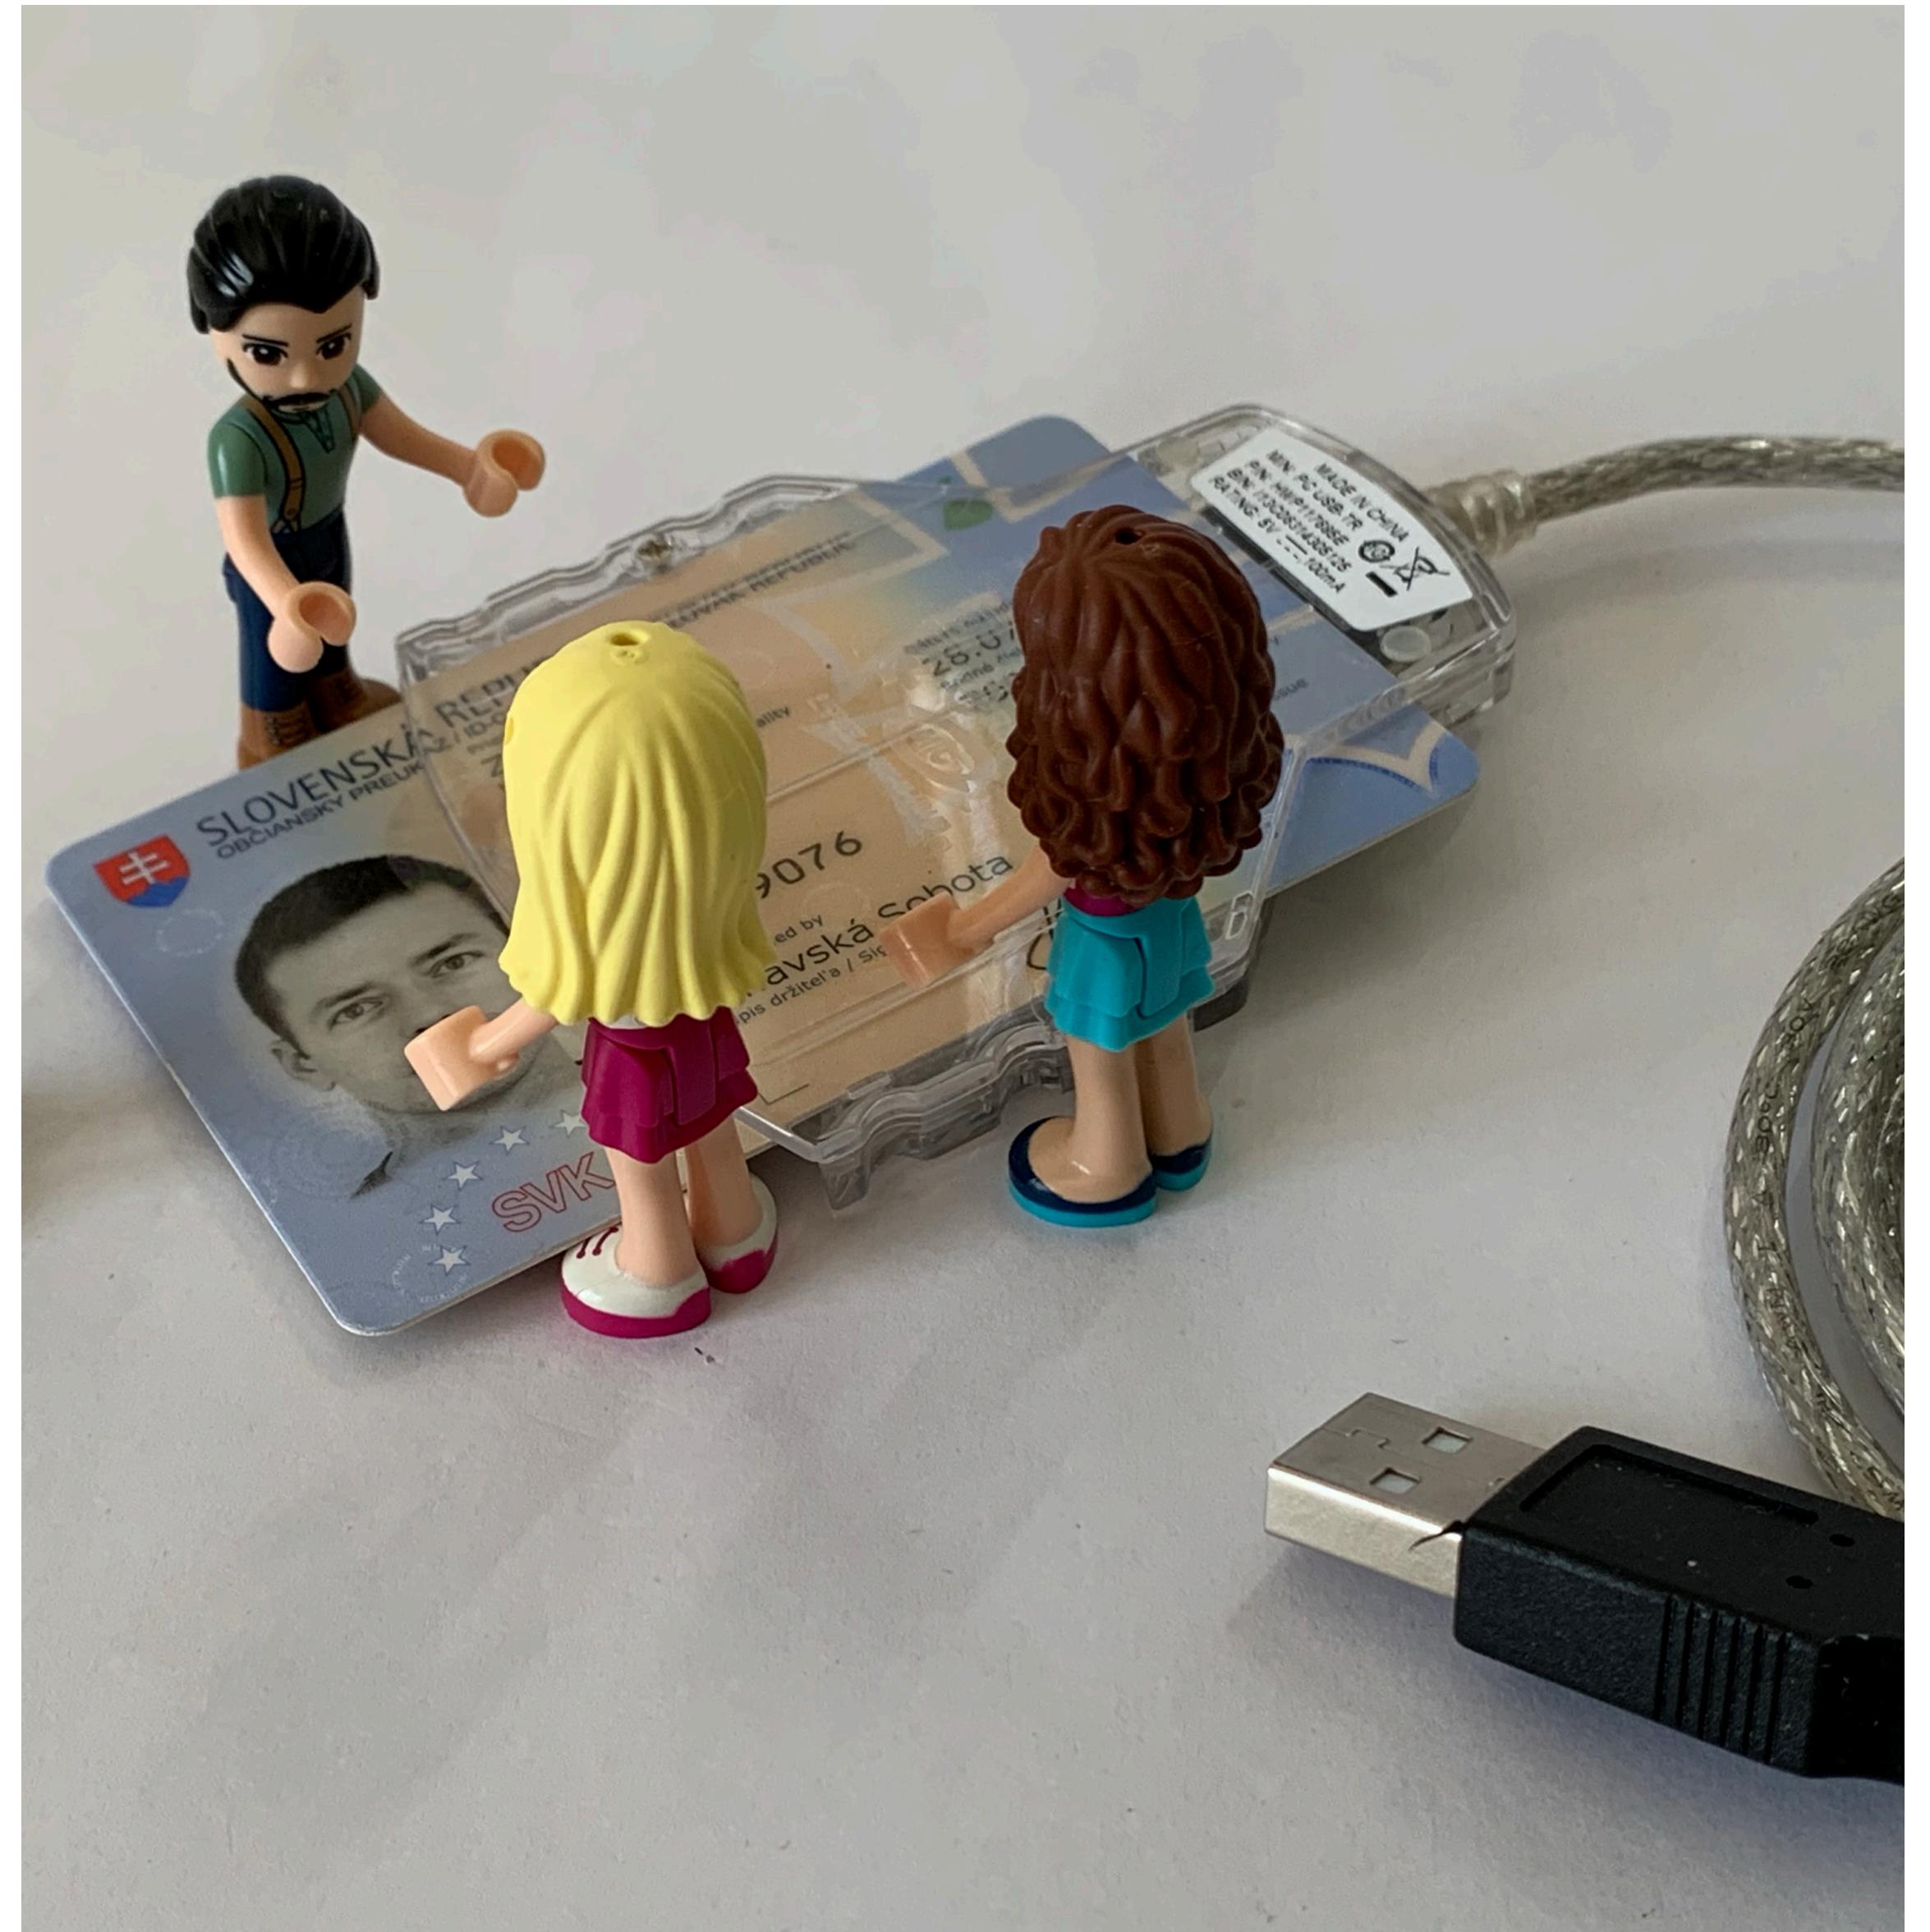

**The post office
cannot be the plan B!**

Solution

e-voting system

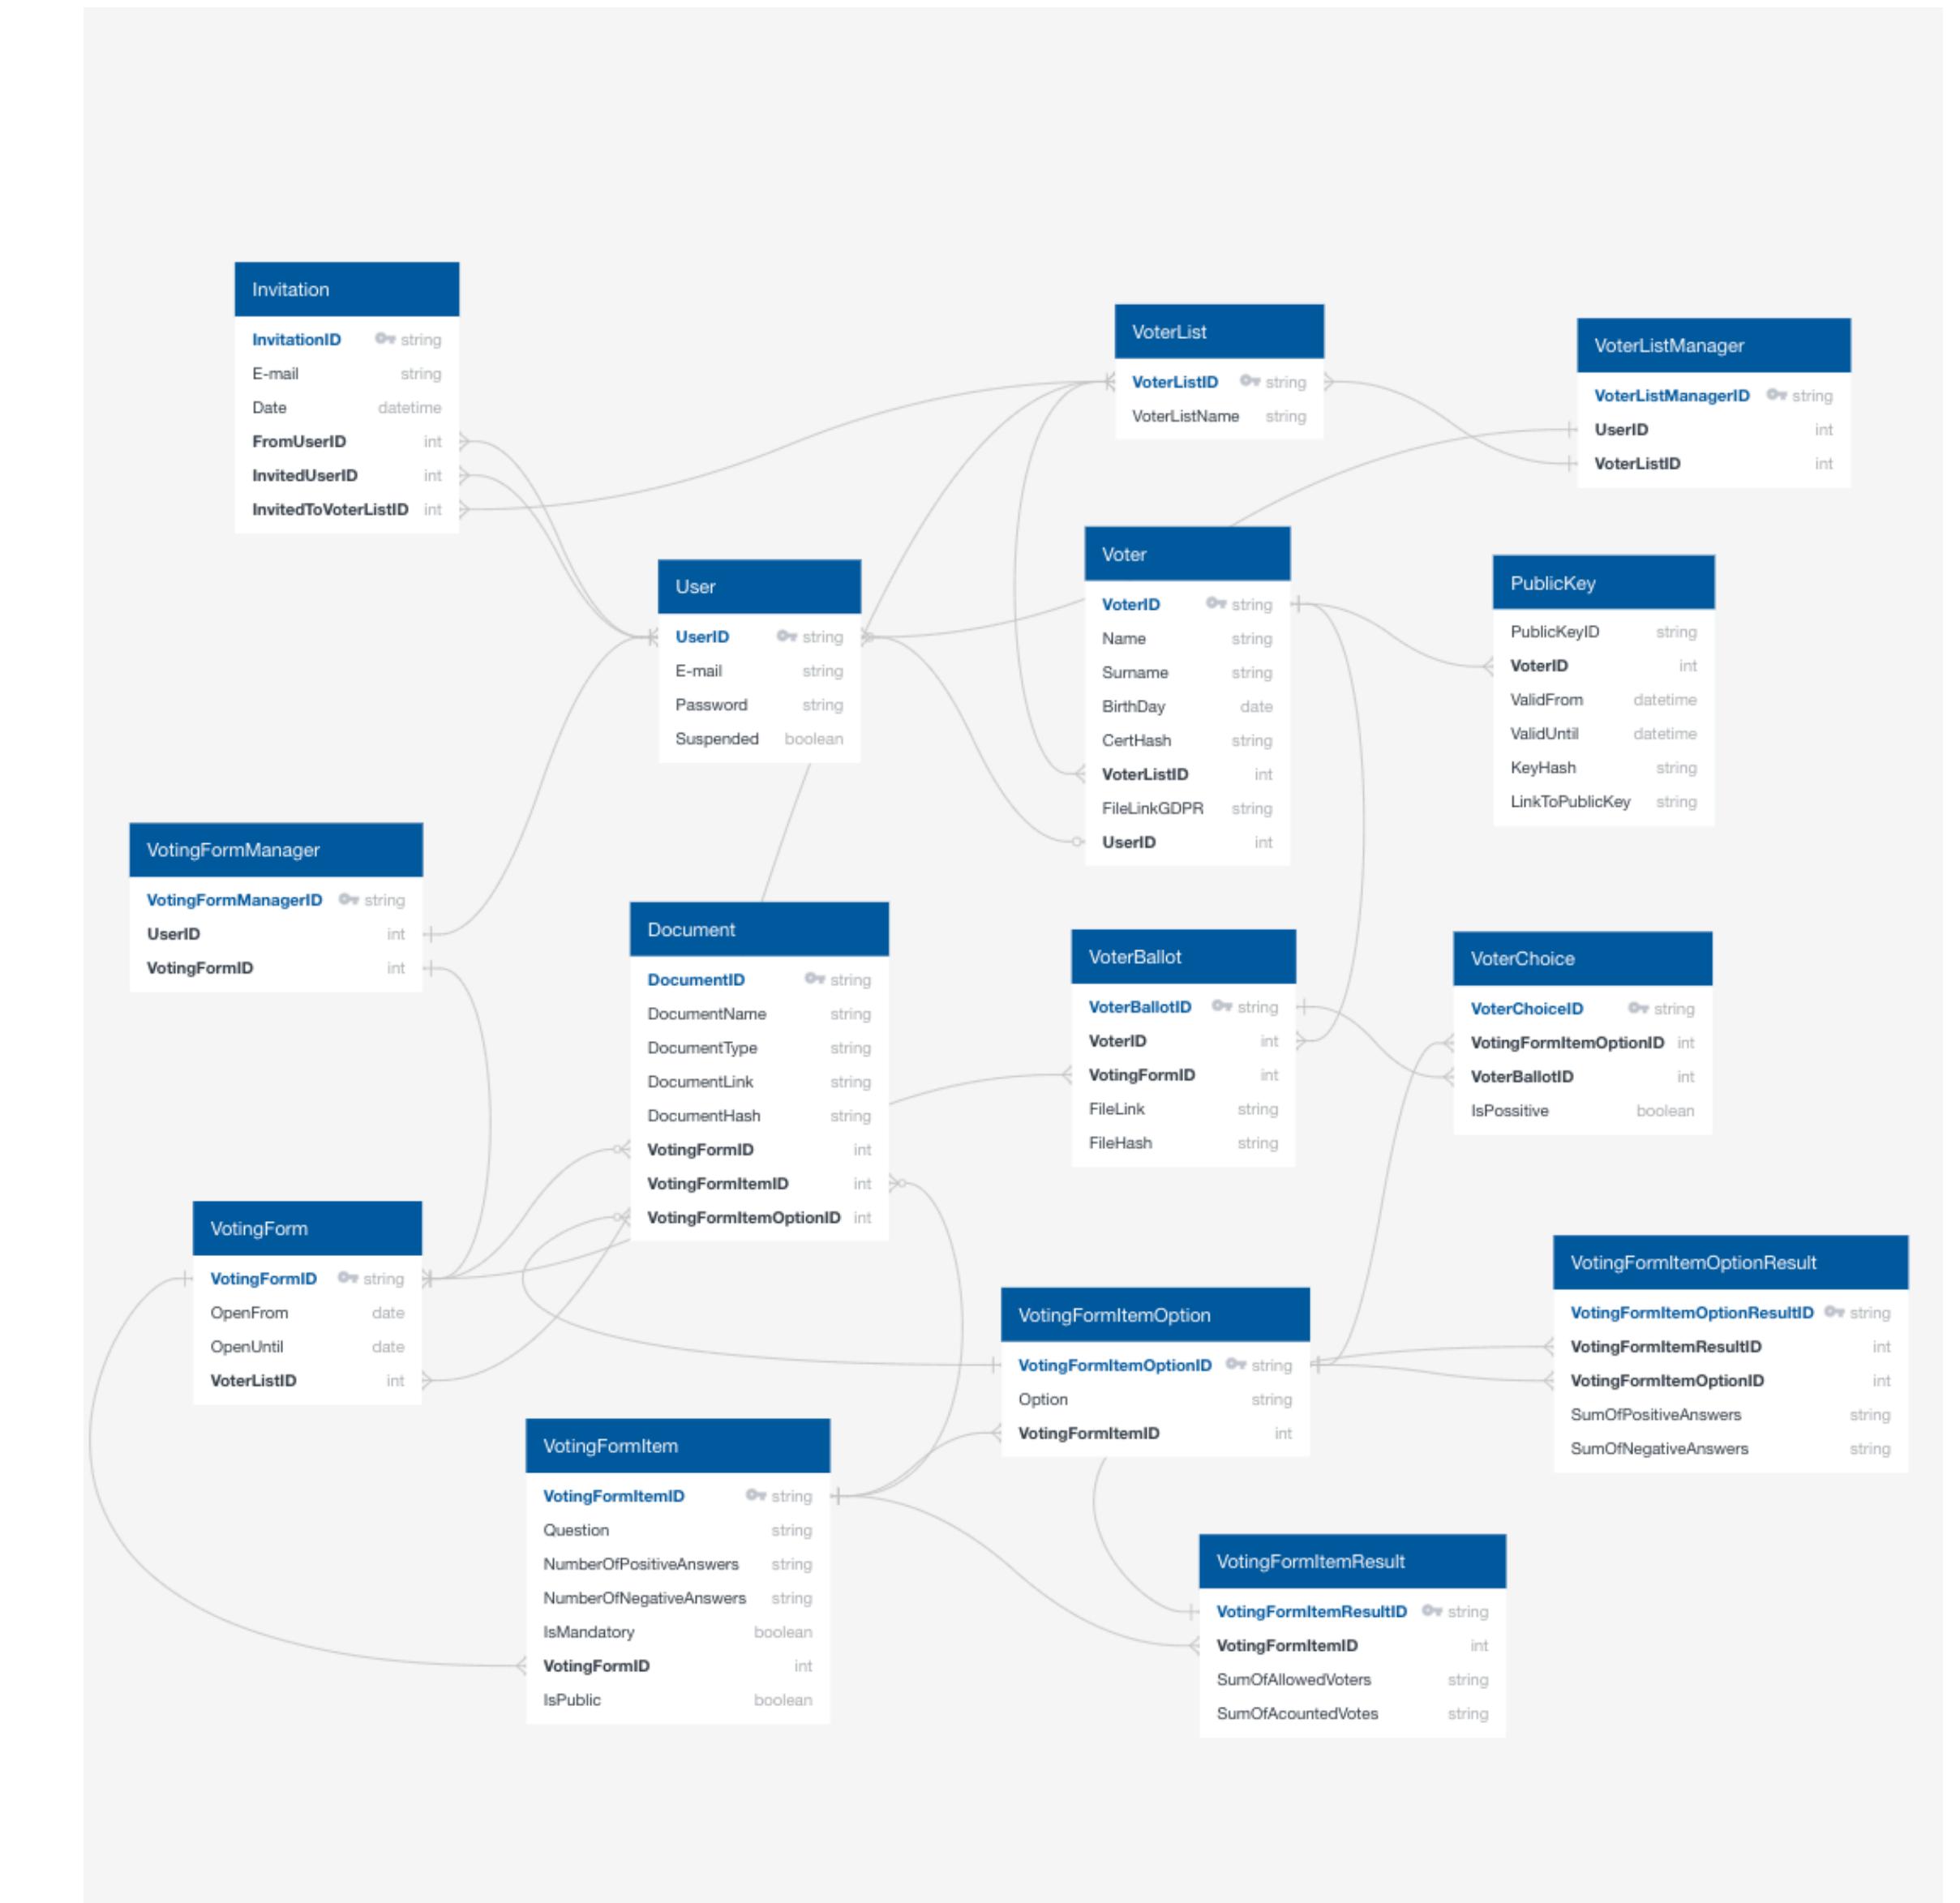

- Qualified electronic signature is accepted in more and more countries so as physical signature verified by lawyer
- Let's use it in voting system to verify authenticity of the voter

Quesadila (open source)

e-voting system – vision:

- manage voters' lists
 - invite voters
 - import voters
- manage voting forms
- public vote using QES
- to change the vote using QES
- to display voting results

Demo: <http://www.qesadila.com>

Legislation makes things possible

- Quick Corona-related decisions save lives and are approved without delays in national parliaments
- The discussion about e-voting in the Slovak national parliament froze a few days ago
- Let's revive the topic!
- Be prepared (for a change)!

Permanent or temporary option?

- Even without crisis e-voting has benefits as we should allow representatives to vote:
 - from home
 - during quarantine
 - from hospital
 - from business trips

**Quesadila protects
representatives, maintains decision-making,
and defends democracy.**

A product? In partnership..

- offered as open source to allow verification of the solution
- customisable with eIDs from different countries
- deployable under management of the municipality
- free service for municipalities during the Corona crisis
- later offered as SaaS

The TEAM:

- Ľudovít Scholtz
- Gabriel Staroň
- Pavol Jančura
- Samuel Šušoliak
- Martin Zilak
- Patrik Procházka
- Samuel Zubo

Thank you for MENTORING to:

- Zuzana Suchová
- Petra Dzurovcinova
- Lenka Katríková
- Vladimír Kordoš
- Marek Fukas
- Michal Weis
- Nadežda Barnakova
- Martin Povrazník
- Ľubomír Lukič
